Contents

Our Goal **i**

Chapter 1. Like Programming, Mathematics has a Culture **1**

Chapter 2. Polynomials **5**
2.1 Polynomials, Java, and Definitions . . . 5
2.2 A Little More Notation . . . 13
2.3 Existence & Uniqueness . . . 14
2.4 Realizing it in Code . . . 22
2.5 Application: Sharing Secrets . . . 24
2.6 Cultural Review . . . 27
2.7 Exercises . . . 27
2.8 Chapter Notes . . . 31

Chapter 3. On Pace and Patience **35**

Chapter 4. Sets **39**
4.1 Sets, Functions, and Their -Jections . . . 40
4.2 Clever Bijections and Counting . . . 48
4.3 Proof by Induction and Contradiction . . . 51
4.4 Application: Stable Marriages . . . 54
4.5 Cultural Review . . . 58
4.6 Exercises . . . 59
4.7 Chapter Notes . . . 61

Chapter 5. Variable Names, Overloading, and Your Brain **63**

Chapter 6. Graphs **69**
6.1 The Definition of a Graph . . . 69
6.2 Graph Coloring . . . 71
6.3 Register Allocation and Hardness . . . 73
6.4 Planarity and the Euler Characteristic . . . 75
6.5 Application: the Five Color Theorem . . . 78

6.6 Approximate Coloring . . . 83
6.7 Cultural Review . . . 85
6.8 Exercises . . . 85
6.9 Chapter Notes . . . 87

Chapter 7. The Many Subcultures of Mathematics **89**

Chapter 8. Calculus with One Variable **95**
8.1 Lines and Curves . . . 96
8.2 Limits . . . 100
8.3 The Derivative . . . 107
8.4 Taylor Series . . . 111
8.5 Remainders . . . 117
8.6 Application: Finding Roots . . . 119
8.7 Cultural Review . . . 125
8.8 Exercises . . . 125

Chapter 9. On Types and Tail Calls **129**

Chapter 10. Linear Algebra **135**
10.1 Linear Maps and Vector Spaces . . . 136
10.2 Linear Maps, Formally This Time . . . 141
10.3 The Basis and Linear Combinations . . . 143
10.4 Dimension . . . 147
10.5 Matrices . . . 149
10.6 Conjugations and Computations . . . 155
10.7 One Vector Space to Rule Them All . . . 158
10.8 Geometry of Vector Spaces . . . 159
10.9 Application: Singular Value Decomposition . . . 164
10.10 Cultural Review . . . 179
10.11 Exercises . . . 179
10.12 Chapter Notes . . . 182

Chapter 11. Live and Learn Linear Algebra (Again) **185**

Chapter 12. Eigenvectors and Eigenvalues **191**
12.1 Eigenvalues of Graphs . . . 193
12.2 Limiting the Scope: Symmetric Matrices . . . 195
12.3 Inner Products . . . 198
12.4 Orthonormal Bases . . . 202
12.5 Computing Eigenvalues . . . 205
12.6 The Spectral Theorem . . . 207
12.7 Application: Waves . . . 209
12.8 Cultural Review . . . 225

12.9 Exercises . . . 226
12.10 Chapter Notes . . . 229

Chapter 13. Rigor and Formality **233**

Chapter 14. Multivariable Calculus and Optimization **239**
14.1 Generalizing the Derivative . . . 239
14.2 Linear Approximations . . . 241
14.3 Vector-valued Functions and the Chain Rule . . . 246
14.4 Computing the Total Derivative . . . 248
14.5 The Geometry of the Gradient . . . 251
14.6 Optimizing Multivariable Functions . . . 253
14.7 Gradient Descent: an Optimization Hammer . . . 261
14.8 Gradients of Computation Graphs . . . 262
14.9 Application: Automatic Differentiation and a Simple Neural Network . . . 265
14.10 Cultural Review . . . 281
14.11 Exercises . . . 281
14.12 Chapter Notes . . . 284

Chapter 15. The Argument for Big-O Notation **291**

Chapter 16. Groups **301**
16.1 The Geometric Perspective . . . 303
16.2 The Interface Perspective . . . 307
16.3 Homomorphisms: Structure Preserving Functions . . . 309
16.4 Building Blocks of Groups . . . 312
16.5 Geometry as the Study of Groups . . . 314
16.6 The Symmetry Group of the Poincaré Disk . . . 324
16.7 Application: Drawing Hyperbolic Tessellations . . . 329
16.8 Cultural Review . . . 345
16.9 Exercises . . . 345
16.10 Chapter Notes . . . 350

Chapter 17. A New Interface **353**

Appendix A. Notation **363**

Appendix B. A Summary of Proofs **365**
B.1 Propositional and first-order logic . . . 365
B.2 Methods of proof . . . 367
B.3 How does one actually prove things? . . . 368

Appendix C. Annotated Resources **373**
C.1 Fundamentals and Foundations . . . 373

C.2 Polynomials . . . 374
C.3 Graph Theory and Combinatorics . . . 375
C.4 Calculus and Analysis . . . 375
C.5 Linear Algebra . . . 376
C.6 Optimization . . . 377
C.7 Abstract Algebra (Groups, etc.) . . . 377
C.8 Topology . . . 378
C.9 Computer Science, Theory, and Algorithms . . . 378
C.10 Fun and Recreation . . . 380
